

## SELF FEEDING ROCKET STOVE

**WARNING:** This stove and all components are protected with a heat resistant paint coating that must be properly cured before use. To cure it place the fully assembled stove in an open, well ventilated place and build a small fire in the stove. It is recommended to cure the paint slowly by burning a moderate size fire during this process. Keep feeding that stove for up to 1 hours until the paint has fully cured; the paint should turn to dull black color and the stove will ready to use.

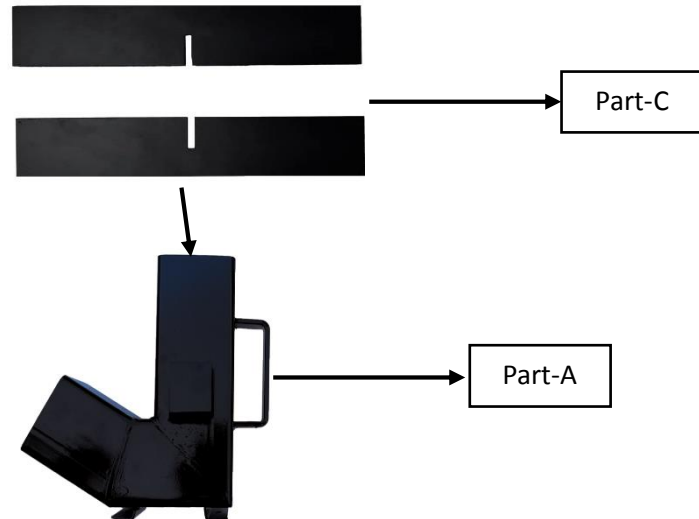

**PART LIST**

<u><b>A</b></u>		<u><b>ROCKET STOVE</b></u>
<u><b>B</b></u>		<u><b>LOWER LEG</b></u>
<u><b>C</b></u>		<u><b>UPPER GRATE PLAT</b></u>
